INSTALLATION MANUAL

Notice:

- Wipe off water after each use with a clean, soft cloth to prevent water spots. Chrome polish can be used.
NEVER use scouring pads or abrasive cleaners with any finish to avoid scratch.
- Never use acid and alkalescent material for cleaning.
- Cartridge and divert are tested in the factory, self disassembly and assembly is not allowed.
- In-floor rough in piece should pass a water test for 30min. under 0.8Mpa before close the tiles, to be sure no water leak.
- In-floor water pipes should be fixed according to the manual strictly, exchange of cold and hot water pipe is not allowed.
- When inside temperature goes to under 0°C, please turn off the water angel valve, open the tap to let water flow out completely.
- In-floor water pipes must be cleaned before tap installation, impurities could damage the cartridge, diverter and aerator.
- CAUTION: when turn on the tap, please turn to cold first, then adjust to suitable temperature, to avoid scald.
- Gloves are needed for installation.

Problems and Solutions:

- If water flow rate is too small, please check the angel valve.
- If water flow is in irregular shape, please check the aerator could have dust.
- If temperature not adjustable, please check the angel valve and connection pipes are correctly installed.

Quality guarantee:

Thank you very much for choosing our products, we will offer full after-sales services. We offer for 2 years limited quality guarantee and whole productlife reparation in terms of:

- Product damage caused by material, manufacture and functional components (not including surface) within 2 years after sales, we offer reparation or same model replacement for free.
